

IWA Tiers of Performance Report

Stove Manufacturer	Envirofit
Stove Model	SuperSaver GL Wood (M-5000)
Testing Center	Colorado State University
Test Protocol	Water Boiling Test - Version 4.2.4
Fuel Used	Mawson Lumber - Whole pine 3/4" trim board
Pot Used	UNHCR 7-L
Test Dates	11/2016 - 12/2016

These results were obtained in accordance with the IWA and the Global Alliance for Clean Cookstoves' reporting requirements¹. This data and additional supporting data are shared publically through the Clean Cooking Catalog.

Name of Tester(s)	Andrew Andraski, Kelly Banta
--------------------------	------------------------------

		Metric	Value	Unit	Sub-Tier
Efficiency / Fuel Use					
Tier	2	High power Thermal Efficiency	35.3	%	3
		Low power Specific Consumption	0.032	MJ/min/l	2
Emissions					
Tier	1	High power CO	4.1	g/MJd	4
		Low power CO	0.053	g/min/l	4
		High power PM 2.5	690.2	g/MJd	1
		Low power PM 2.5	2.99	mg/min/l	2
Indoor Emissions					
Tier	0	Indoor emissions CO	0.301	g/min	4
		Indoor emissions PM 2.5	50.7	mg/min	0
Safety					
Tier	3	10 weighted safety parameters	88.5	Points	3

Tier 0 → Improving Importance → Tier 4

Individual Scores for Safety Assessment Criteria

Please note this is a summary of the criteria evaluated by the Biomass Stove Safety Protocol. For the full protocol and data calculation sheet, visit: <http://www.cleancookstoves.org/our-work/standards-and-testing/learn-about-testing-protocols/>

Assessment Criteria	Score 1-4	Multiplier	Subtotal
Sharp Edges and Points	4	1.5	6.0
Cookstove Tipping	4	3.0	12.0
Containment of Fuel	3	2.5	7.5
Obstructions Near Cooking Surface	4	2.0	8.0
Surface Temperature	1	2.0	2.0
Heat Transmission to Surroundings	4	2.5	10.0
Temperature of Operational Construction	4	2.0	8.0
Chimney Shielding	4	2.5	10.0
Flames Surrounding the Cookpot	3	3.0	9.0
Flames/Fuel Exiting Fuel Chamber, Canister, or Pipes	4	4.0	16.0
Total			88.5

Stove Rating	Good
